

User Guide

Our application offers two main sections: Learn Mode and Quiz Mode. Additionally, we have included an informational screen for parents. The home page is designed with three buttons, each representing one section. Additionally, for a fun surprise, we have hidden an easter egg that can be found by clicking on the logo!

Learn Mode

Learn Mode is specifically designed to help children learn phonetic sounds. This mode consists of buttons for each letter, which will play the corresponding sound when pressed. Children can practice these sounds as much as they like and return to the home page with the back button.

Quiz Mode

Quiz Mode consists of 10 multiple choice questions in which a phonetic sound is played, and the child is given the choice of four answers. Once a child selects an answer, they are segued to the results page that shows correct in green writing and a baby smiling, or incorrect in red writing and a frowning baby. Once the child has answered 10 times, the score is given, and the child can return back to the quiz section to try again or hit the back button again to return to the home page.
